GT Plus

Wireless Internet Alarm Systems

Cloud Connectivity

GT Plus is fully Cloud enabled, enabling installers and users to access the full range of RISCO products and services.

Wi-Fi Enabled

Communication options include Wi-Fi and multi-socket 2G/3G allowing you to customise to the specific needs of the application.

Remote Monitoring

- > HOME

- > INDUSTRIAL
- > EXTERIOR PROTECTION

Designed with ease of use in mind

GT Plus is a powerful and flexible hybrid wired and wireless system, featuring an advanced scalable control panel for any type of application - residential, small business or commercial, with maximum flexibility, up to 512 zones.

The GT range now comes with the addition of Cloud and Wi-Fi, giving total flexibility and remote access to your alarm system.

Remote Configuration and Diagnostics

GT Plus can be controlled, configured and diagnosed by RISCO Group's field proven Configuration Software (CS). The CS enables your installer to remotely configure and manage your installed RISCO Group systems, perform automated batch operations on selected groups of panels and more.

Powered by the RISCO Cloud

RISCO's Cloud based solution enables users the best future proof security system. This can be integrated with added value products and services such as indoor and outdoor visual verification, video monitoring and recording, video doorbell and smart home – allowing users to control their security, video and automation from one interface, saving precious time and enabling the right decisions to be taken in real time.

Communication Options including Wi-Fi

GT Plus has a complete choice of communication modules such as multi-socket IP, multi-socket 3G and Wi-Fi. Whether your installation requires simultaneous communication with multiple destinations to ensure the full redundancy and resiliency or a quick installation with Wi-Fi module, you can customise your solution to the specific need of the application.

GT Plus

Indoor & Outdoor Visual Verification

Real time event verification, delivered by indoor and outdoor integrated camera detectors, providing a series of high resolution, full colour images and a short clip directly to your smartphone app or monitoring stations, allowing you to verify the nature of the alarm and act accordingly.

Wide range of wired and wireless detectors

A complete range of professional wired and wireless detectors for both the Grade 2 and Grade 3 security levels. RISCO Group's unique detection technologies offer superior detection performance, reliability and false alarm immunity in even the most challenging indoor and outdoor environments.

Our detectors are also available as Bus models, providing a unrivaled benefit of remote diagnostics and configuration, saving you fault finding and maintenance time.

Smart Touchscreen Keypad

The RisControl Smart Touchscreen Keypad is a responsive and high resolution 8" touchscreen keypad with an intuitive, easy to navigate user interface and the look and feel of a Smartphone App.

It allows users to utilise all keypad functionalities as well as the RISCO Cloud functions such as controlling the alarm and video monitoring, from one customisable interface.

TO SEE A LIVE DEMONSTRATION VISIT:
129 AVON ROAD, UPMINSTER, ESSEX RM14 1RQ

WHAT WE HAVE HERE IS:

An alarm control panel that can be simple to turn the alarm on and off from a digital keypad, tag or fob.

This is for the customer that just wants to use the alarm as an alarm with no additions. (Upgrades available at any time should the need arise). Can support wired or wireless detectors. Or as a mix of both. Supports renewal of old alarm panels with wired detectors with the addition of some wireless detectors. Extremely flexible.

WITH ADVANCEMENTS WE HAVE:

An alarm control panel that can be advanced to have some or all of the available Upgrades a list of which are shown below.

**Cloud connectivity allowing full control of the alarm and any cameras fitted
Via the Risco APP.**

Integrated CCTV on the same APP as the Alarm.

**Communicated to Police Using various types of signaling with real time indoor
and outdoor visual verification.**

**Touch Screen Smart keypad that can display CCTV pictures as well as control all
aspects of the alarm.**

FULL TECHNICAL SPECIFICATION UPON REQUEST.
